General Certificate of Secondary Education November 2021

## Mathematics

Unit M2<br>(With calculator)<br>Foundation Tier<br><br>[GMC21]<br>*GMC21*<br>MONDAY 29 NOVEMBER, 9.15am-11.00am

## TIME

1 hour 45 minutes.

## INSTRUCTIONS TO CANDIDATES

Write your Centre Number and Candidate Number in the spaces provided at the top of this page. You are provided with Foundation Tier Additional Support Materials for use with this paper.
You must answer the questions in the spaces provided.
Do not write outside the boxed area on each page or on blank pages.
Complete in black ink only. Do not write with a gel pen.
Answer all twenty-six questions.
All working should be clearly shown in the spaces provided. Marks may be awarded for partially correct solutions.
You may use a calculator for this paper.

## INFORMATION FOR CANDIDATES

Functional Mathematics is assessed in this unit.
The total mark for this paper is 100 .
Figures in brackets printed down the right-hand side of pages indicate the marks awarded to each question or part question.
You should have a calculator, ruler, compasses and a protractor.
The Formula Sheet is on page 2.
12918.07 R

## Formula Sheet

Area of trapezium $=\frac{1}{2}(a+b) h$

Volume of prism $=$ area of cross section $\times$ length

Г Formula Sheet

1 Five friends had these bank balances.

|  | $£$ |
| :--- | ---: |
| Bernie | 230 |
| Jonny | -570 |
| Sara | 65 |
| Wendy | 460 |
| Jason | -190 |

(a) List the balances in order, starting with the lowest.
(b) Jason receives $£ 120$ for his birthday and puts it into his bank account.

What is his new balance?

Answer $\qquad$ [1]
(c) How much more money is in Bernie's bank account than in Jonny's?

Answer £ $\qquad$ [1]

2 The ages, in years, of a family are shown.

## Dave 47 Ellie 21 Fergus 18 Geri 44 Harry 10 Ivy 25

(a) What is the range of the ages?

Answer $\qquad$ years [1]
(b) What is the mean age?

Answer $\qquad$ years [3]
(c) What was the mean age of the family two years ago?

Answer $\qquad$ years [1]

3 Five drawings related to sailing are shown.

(a) Which drawing has rotational symmetry of order 3?

Answer $\qquad$ [1]
(b) Which drawing has exactly 1 line of symmetry?

Answer $\qquad$ [1]
(c) Which two drawings have both line symmetry and rotational symmetry?

Answer $\qquad$ [1]

4 Pupils were asked which activity they prefer.
The results were

| Cinema | $35 \%$ of the pupils |
| :--- | :--- |
| Bowling | $\frac{2}{5}$ of the pupils |
| Ice skating | $\frac{1}{4}$ of the pupils |

(a) The teacher says "Bowling was more popular than cinema."

Is the teacher correct?
You must show working to explain your answer.

Answer $\qquad$ because $\qquad$
$\qquad$
(b) 15 pupils said they preferred ice skating.

How many pupils were asked altogether?

Answer

6 Jessica fits guttering around buildings.
She measures the length (L) and width (W) for rectangular sheds in metres.

To work out the total amount (T) of guttering needed, Jessica uses the formula

$$
\mathrm{T}=2 \mathrm{~L}+2 \mathrm{~W}
$$

(a) How much guttering will Jessica need for this shed?

diagram not
drawn accurately

Answer $\qquad$ m [2]
(b) Jessica measured another shed.

diagram not drawn accurately

The total (T) was 19.9 m .
Work out the width (W) of this shed.

Answer $\qquad$

7 Here is a cuboid.

(a) What is the area of the front face of the cuboid?

Answer $\qquad$ $\mathrm{cm}^{2}$ [1]
(b) Work out the volume of the cuboid.

Answer $\qquad$ $\mathrm{cm}^{3}$ [2]

8 Dylan needs to get part of his house painted.
He has a budget of $£ 200$
He needs to buy 3 tins of paint, each costing $£ 16.75$
He employs a painter who is paid $£ 12.30$ per hour.
How many full hours will the painter have to complete the work without going over Dylan's budget?

Answer $\qquad$ [3]

9

diagram
not
drawn
accurately

ABC is a right－angled triangle．
ACD is an isosceles triangle．
$B C D$ is a straight line．
Calculate the size of
（a）angle ACB ，
$\qquad$
（b）angle ADC．

Answer $\qquad$ ${ }^{\circ}$［3］

11 A solid is made from 1 cm cubes.

(a) On the grid below draw the side elevation of the solid.

(b) What is the smallest number of cubes you would need to add to the solid to make it into a cube?

Answer $\qquad$

13 A manager is preparing to draw a pie chart to display how 40 workers travel to work. The table below shows some of her information.

| Transport | Number of <br> workers | Angle |
| :--- | :---: | :---: |
| Car |  | $45^{\circ}$ |
| Bus |  | $108^{\circ}$ |
| Walk | 10 |  |
| Train |  |  |
| Bike | Total $=40$ |  |
|  |  |  |

Use the information in the table to work out what angle will represent those who travel by bike.

## Show all your working clearly.

$\qquad$

15 A tracksuit normally cost $£ 75$
(a) In a sale the price was reduced by $15 \%$

Calculate the sale price of the tracksuit.

Answer £ $\qquad$
(b) The following week the shop displayed this sign.

## FINAL STOCK CLEARANCE A FURTHER 20\% OFF ALL SALE PRICES

Show that the tracksuit now costs $£ 51$
(c) Rhys says, "I am getting $15 \%$ off, then $20 \%$ off, so I am getting $35 \%$ off the $£ 75$." Is he correct?

You must show working to explain your answer.

Answer $\qquad$ because $\qquad$
$\qquad$

16 A girl collects the following data in metres (m) in a Science experiment.

## $\begin{array}{llllllllllllll}0.32 & 0.51 & 0.43 & 0.64 & 0.39 & 0.49 & 0.62 & 0.54 & 0.52 & 0.36 & 0.54 & 0.68 & 0.48 & 0.52\end{array} 0.60$

(a) She states, "The median is the one in the middle so my median is 0.54 m ."

Explain why she is not correct.
Answer $\qquad$
$\qquad$
(b) She then decides to show her data in a stem and leaf diagram.

The first three are recorded.
Complete the stem and leaf diagram.

| 0.3 | 2 |
| :--- | :--- |
| 0.4 | 3 |
| 0.5 | 1 |
| 0.6 |  |

KEY: $0.3 \mid 2=0.32 \mathrm{~m}$
(c) Give one advantage of displaying the data in a stem and leaf diagram.

Answer $\qquad$
$\qquad$
(d) Use the stem and leaf diagram to write down the correct median.

Answer $\qquad$ m [1]

17 The attendance for some classes is shown below.
Class A $\quad 17$ pupils out of 20 were present.
Class B 21 pupils out of 24 were present.
Class C 19 pupils out of 22 were present.
Which class had the highest percentage attendance?
You must show working to justify your answer.

Answer $\qquad$ [3]

18 John receives a wage of $£ 400$ per week.
$\frac{2}{5}$ of his wage is spent on rent.
$\frac{1}{4}$ of his wage is spent on food.
$\frac{3}{20}$ of his wage is used to pay other bills.

What fraction of John's wage is left?

Answer $\qquad$ [3]

19 (a)

The area of the trapezium is $36 \mathrm{~cm}^{2}$ Calculate its height $h$.

Answer $\qquad$ cm [2]
(b) A different trapezium is drawn below.

Calculate its height $y$.

Answer $\qquad$ cm [4]

20 A number, expressed as a product of its prime factors, is $2^{2} \times 3 \times 5^{2}$
(a) What is the number?

Answer $\qquad$
(b) (i) This number is multiplied by 9

Write the new number as a product of its prime factors.

Answer $\qquad$
(ii) Is this new number a square number?

You must explain your answer.

Answer $\qquad$ because $\qquad$
$\qquad$

21 Jane completes a 5 km race in 24 minutes.
Calculate her average speed in $\mathrm{km} / \mathrm{hr}$.
$\qquad$ $\mathrm{km} / \mathrm{hr}$ [2]

23 James can throw a javelin 49 metres.
His target is to throw it 4\% further each year.
If he stays on target, how many years will it be before he can throw the javelin 55 metres?

You must show working to justify your answer.

Answer $\qquad$ years [4]

24 The number of hours of daily sunshine is recorded at a resort during four months.

| Hours of daily sunshine | Frequency |  |  |
| :---: | :---: | :--- | :--- |
| $0<\mathrm{h} \leq 3$ | 18 |  |  |
| $3<\mathrm{h} \leq 6$ | 45 |  |  |
| $6<\mathrm{h} \leq 9$ | 37 |  |  |
| $9<\mathrm{h} \leq 12$ | 19 |  |  |
| $12<\mathrm{h} \leq 15$ | 4 |  |  |

Calculate an estimate of the mean number of hours of daily sunshine at the resort during the four months.

Answer $\qquad$ hours [4]

25 Janet sees a scatter graph which displays the age and blood pressure of 10 adults.

Janet is aged 41 and her father is 84
She comments that a good estimate for her blood pressure would be 139 whilst a good estimate for her father's would be 156

Do you think her estimates are reliable? Explain your reasoning clearly.
$\qquad$
$\qquad$
$\qquad$
$\square$

26 The diagrams below show a square and an isosceles triangle.

diagrams
not drawn
accurately

They have the same perimeter.
By forming and solving an equation, work out the perimeter.

Answer

THIS IS THE END OF THE QUESTION PAPER
